**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --****Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on June 9, 2006 has been entered.

### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 27 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claim positively recites the ostium vaginae and labia inner wall, which are parts of the human body.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3761

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 2, 8 – 10 and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 4-128728.

With reference to claim 2, JP 4-128728 discloses an interlabial pad wherein a side end of the interlabial pad has a shape of an arc, and peripheral ends of the arc converge toward edge ends of a center line of the pad along a longitudinal direction as set forth in figures 1 – 2.

Regarding claims 8 – 10, see figures 1 – 3. The examiner contends that the interlabial pad of JP 4-128728 is fully capable of performing the recited function.

With respect to claim 22, JP 4-128728 discloses an interlabial pad comprising a pair of absorbers (2a, 2b), a pair of water permeable cover sheets (figures 1 and 3) covering absorbers respectively, each water permeable cover sheet having a peripheral edge portion (figure 3), and a support sheet (3) having a peripheral edge that is bonded to the peripheral edge portion of each of the pair of water permeable cover sheets on a body face side of the support sheet (figure 1), wherein each of the pair of water permeable cover sheets is separated from the other water permeable cover sheet along a folding portion (figure 2) of the support sheet, so that when the support sheet is folded away from the pair of water permeable covers sheets, the interlabial pad forms a void between a garment face side of the water permeable cover sheet and the body face side of the support sheet as set forth in figures 2 and 3.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 23 – 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 4-128728.

The difference between JP 4-128728 and claim 23 is the provision that the cover sheets are separated by 10mm or less.

It would have been obvious to one of ordinary skill in the art to modify the distance in which the cover sheets are separated in order to produce the most effective product since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable range involves only a level of ordinary skill in the art.

As to claim 24, see the rejection of claim 23.

With respect to claims 25 and 26, the examiner contends that it is well known in the art to provide absorbent articles with either an impermeable or permeable material to produce desired results.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michele Kidwell whose telephone number is 571-272-4935. The examiner can normally be reached on Monday thru Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tatyana Zalukaeva can be reached on 571-272-1115. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
